

Our Product

Unwanted visitors?

Keep those insects out.

Magnetic Insect Screens are flexible mesh screens which adhere to the inside of your window frame using our unique magnetic sealing system.

Our magnetic insect screens are the most efficient, technically advanced insect screens currently available on the market. Your home is a healthier, more comfortable place to live in when you can keep pests out, but let the fresh air in.

Our environmentally friendly screens are an extremely affordable option as they attach to your existing infrastructure. They are unobtrusive and sourced from the best quality materials and custom-made to exacting standards to form a complete seal around your window. Exclusive snap-back action makes opening and closing your windows a breeze.

Screens are available in nine standard colours or can be colour coordinated to match your joinery and compliment any interior including domestic homes, restaurants, high rise buildings, hospitals, boats and caravans.

Installing Magnetic Insect Screens eliminates the need to use sprays for pest control keeping your home a clean, green and healthy place to live.

Our Screens come with a 12 month warranty on workmanship and materials. The insect screens are Design Patented in Australia, New Zealand and World wide.
