

Roller Blinds

Roller blinds offer both welcome shade in summer and insulation in winter.

Our inspiring range of conservatory, window and roof roller blinds come in designs to suit any home or office, providing all the privacy you desire for your window shades.

With new Sunfilter and Blockout fabrics available Venluree can offer you protection from the sun during the day but still give you controlled lighted in your house. Block out fabrics give you total privacy and warmth during the night and come in a range of colours to compliment your interior furnishings and decor.

Or if you wanted both we can offer you a roller blind system that can have both these fabrics on the same system for ultimate control at your window. Venluree can offer a wide range of accessories, safety devices and springs to assist in the operation of your roller blinds and can provide motorisation to most systems.

Venluree uses Anodised tubes and Powdercoated components to prevent rusting. All components can be colour coordinated with matching mechanisms and chain.
