

Timber Venetian Blinds

Timber Venetian blinds bring warmth and style to your living environment.

American Poplar is long established as the premium grade timber used in blinds for windows.

Its appeal, is its strength and more distinct grain. American Poplar has amazing strength characteristics and at the same time being light and rigid making it ideal for wooden Venetians. It offers a reasonable amount of hardness, giving good resistance to knocks and bumps

American poplar is particularly better suited for stained and painted wooden blinds. Our Timber Venetian Blinds can be custom made-to-order. Using quality American Poplar timber with 50mm and 60mm wide slats we can enhance the look of your home.

All our timber blinds are finished using UV paint or lacquer, giving it an excellent finish and also being environmentally friendly
