

Illusion Blinds

Create the mood you want. Have control over your privacy and regulate the level of soft diffused light with Illusion Blinds

Illusion Blinds are a sheer fabric Venetian, crafted from lightweight fabric louvres that hang between two sheets of sheer fabric, allowing you to alter the direction of the light and adjust the level of privacy without disrupting your view.

Vary the angle of the fabric slats to enjoy an unobstructed view.

The unique cord control system not only lets you control the angle of the horizontal panels, but also retracts the blind into its stylishly designed cassette system. Illusion will look good in any room and is available in a range of contemporary colours to suit any decor.
